

Chemistry Catalog Overview

Synovo GmbH is a pharmaceutical contract research enterprise located in Tübingen in Southern Germany providing services in **preparative chemistry** and **pharmacology**.

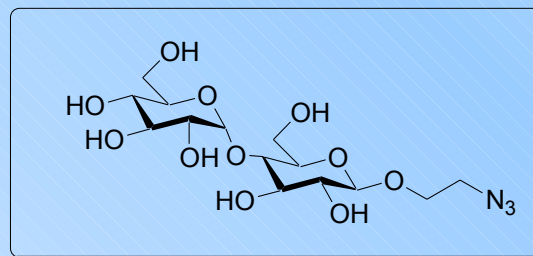

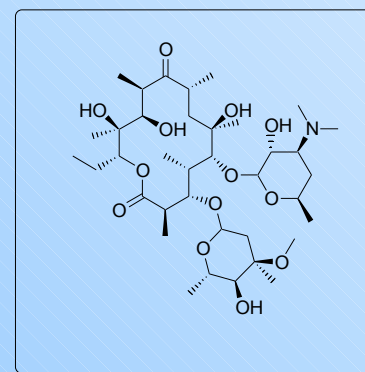

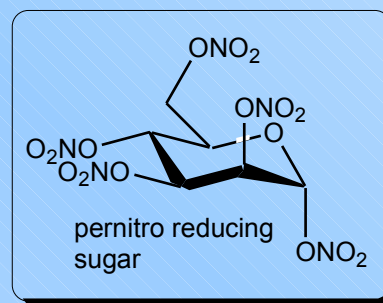

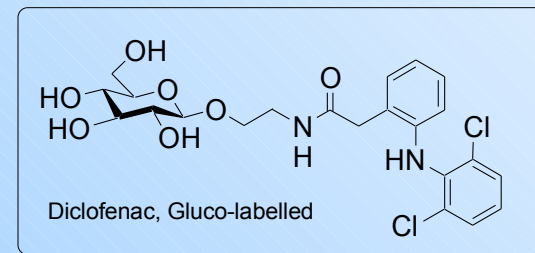

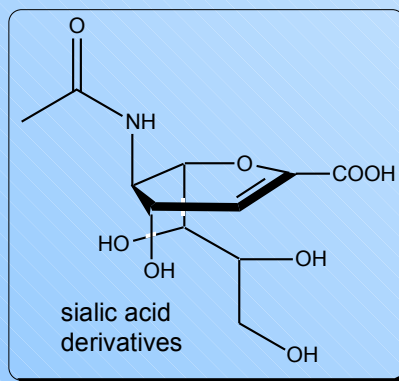

As part of our synthetic chemistry program, we offer the following:

- ✓ Building blocks designed to meet the needs of our partners during the early stages of discovery include:
 - Saccharides
 - Organic nitrates
 - Macrolides
 - Small molecules
- ✓ Individually designed building blocks for the synthesis of more complex molecules such as oligosaccharides or other natural products
- ✓ Elegant and unique „in-house“ technology for production of organic nitrates and nitro compounds
- ✓ Chemical manipulations on macrolides

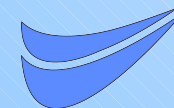

Chemical Catalog

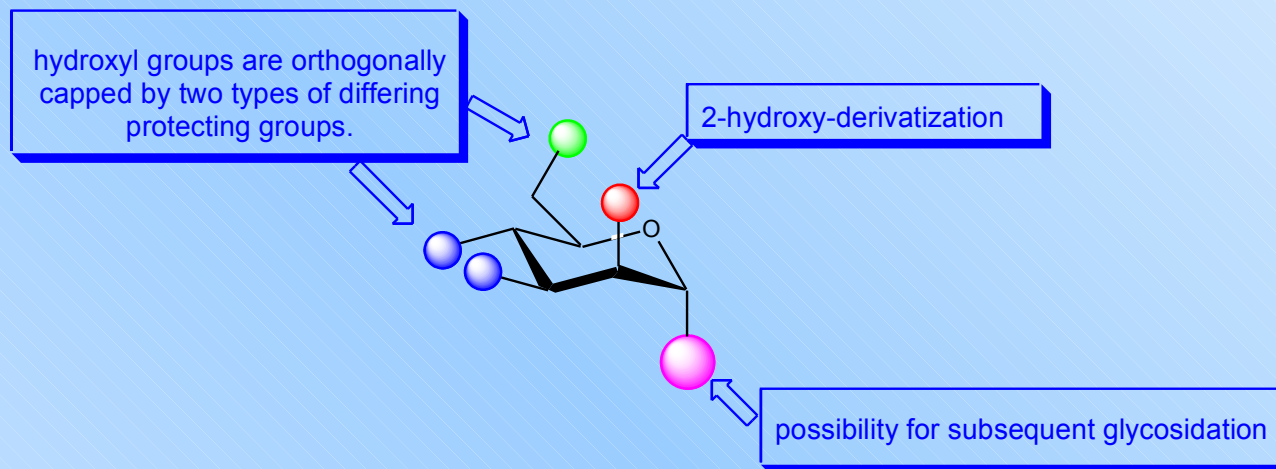

- Saccharides
 - Mannose
 - Glucose
 - Galactose
 - Other Glyco
- Organic Nitrates
- Macrolides
- Miscellaneous

[Return to Overview](#)

Overview of our Novel Nitration Technology

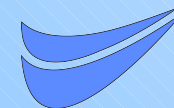

mild and highly selective nitration makes valuable *O*-, *S*- and *NH*-nitrates accessible

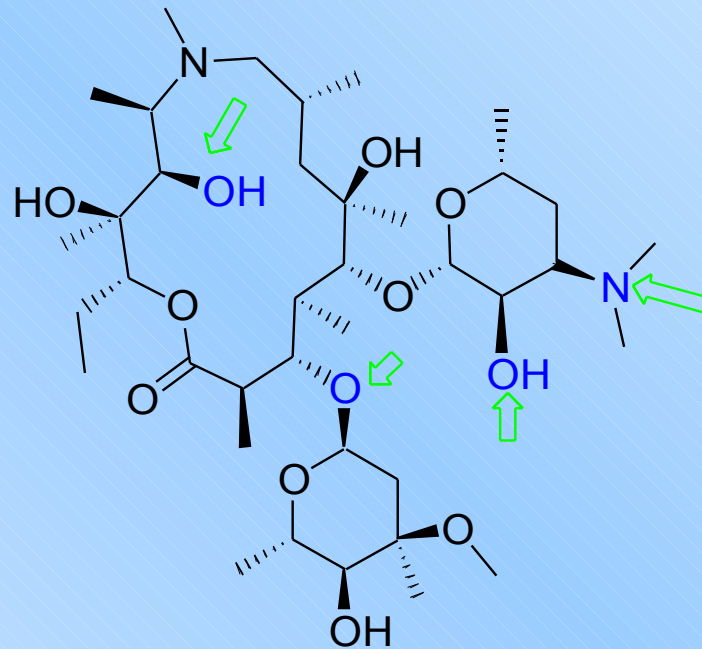

our novel nitration process safely yields geminal dinitro compounds useful for subsequent derivatization as well as for energetic material application
